Green Technology

International Battery (IB) is a green technology company providing environmentally friendly, large format, rechargeable lithium-ion cells and batteries – designed, developed and manufactured in the USA. IB provides next generation cell chemistries, electronics and advanced packaging technologies, broad design experience,

and offers total solutions for rechargeable battery applications. Our batteries can be used in a wide range of vehicular, industrial and military applications.

Corporate Brochure

Only IB offers customers:

The ability to reduce the number of cells in their application by 5-15x

An optimal balance of energy and power

The industry's only organic solvent-free production process

The only end-to-end, all-American source of lithium-ion solutions
